Greeting. Before we dive into the analysis, **could you please share your role (e.g., Data Analyst, Business/Product Manager, VP/Executive)?** This will allow me to tailor future insights and detail levels to your specific needs.

1. Revenue Breakdown Across Channels

Here is the revenue performance across all channels for **Month 6** (latest) compared against **Month 5**:

- Month 6 Breakdown**
- Overall Business:**
 - Gross Sales:** \$4,321,322.00
 - Net Sales:** \$3,970,064.00
 - Transactions:** 7,360

* **Net Sales / Txn:** \$539.00 | **Avg. Basket Size:** 2.7 items

* **Physical Stores (In-Store):**

* **Gross Sales:** \$2,398,407.00 *(55.5% of total revenue)*

* **Net Sales:** \$2,202,909.00

* **Transactions:** 4,070

* **Net Sales / Txn:** \$541.00 | **Avg. Basket Size:** 2.7 items

* **Web Channel:**

* **Gross Sales:** \$1,074,165.00 *(24.9% of total revenue)*

* **Net Sales:** \$984,799.00

* **Transactions:** 1,825

* **Net Sales / Txn:** \$540.00 | **Avg. Basket Size:** 2.7 items

* **App Channel:**

* **Gross Sales:** \$848,750.00 *(19.6% of total revenue)*

* **Net Sales:** \$782,356.00

* **Transactions:** 1,465

* **Net Sales / Txn:** \$534.00 | **Avg. Basket Size:** 2.7 items

Month 5 vs. Month 6 Performance Comparison

	Channel	Month 5 Gross Sales	Month 6 Gross Sales	YoY/MoM Change (\$)	MoM Growth (%)
		:---	:---	:---	:---
	Store	\$2,572,775.00	\$2,398,407.00	-\$174,368.00	-6.78%
	Web	\$1,109,505.00	\$1,074,165.00	-\$35,340.00	-3.19%
	App	\$849,247.00	\$848,750.00	-\$497.00	** -0.06% (Flat) **
	Overall	**\$4,531,527.00**	**\$4,321,322.00**	**-\$210,205.00**	** -4.64%**

2. Executive Context & Key Takeaways

1. **Physical Stores Lead Volume, But Contracting:** Physical stores remain the primary revenue engine (~55.5% share), but experienced the largest month-over-month decline (-6.78% in Gross Sales, driven by a drop of 186 transactions).
2. **App Channel Stability:** While Web (-3.19%) and Store (-6.78%) experienced pullbacks from Month 5 to Month 6, **App revenue remained virtually flat (-0.06%)**, indicating stronger customer retention and channel habituation among mobile app users.
3. **Consistent Basket Economics:** Across all channels, transaction economics remain

tightly aligned:

- * **Net Sales per Transaction:** Ranges from **\$534** (App) to **\$541** (Store).

- * **Basket Size:** Uniform at **2.7 items/transaction** across all channels.

4. **Discounting/Promotional Gap:** The variance between Gross and Net Sales sits at roughly **8.1% to 8.3%** across all channels, showing uniform promotional impact.

3. Strategic Recommendations

1. **Remediate In-Store Foot Traffic / Conversion Decline:**

- * Investigate store-level foot traffic and regional trends. Implement omnichannel strategies such as **Buy Online, Pick Up In Store (BOPIS)** to drive online shoppers into physical locations.

2. **Double Down on Mobile App Acquisition:**

- * Given that the App channel showed superior resilience during the overall topline contraction, prioritize campaigns encouraging Web shoppers to download and purchase via the App.

3. **Analyze Promotional Efficiency:**

- * Evaluate whether the ~8% gross-to-net sales gap (discounting) is driving incremental volume or simply diluting margins, especially since basket size remains unchanged at 2.7 items across channels.

🔍 Next Steps & Deep-Dive Options

Would you like to explore any of the following to help pinpoint the root causes?

1. **Store-Level Deep Dive:** Look into specific city/store location performances (``rtl_agg_overall_store_monthly_kpis``) to identify which specific California stores caused the MoM drop.

2. **Returns Impact:** Compare return rates across Web vs. App vs. Store (``rtl_agg_by_channel_returns_kpis_month``).

3. **Customer Loyalty Segmentation:** Analyze channel preferences by Loyalty Tier (``rtl_agg_overall_loyalty_monthly_kpis``).
