Ask questions about retail data and get automated SQL insights.

what is my monthly revenue?

Submit Query

Findings:

1. Direct Answer

Here is your monthly revenue breakdown based on the overall pre-aggregated monthly sales data:

***Month 6 (Latest Month):**
* **Gross Sales:** \$4,321,322.00
* **Net Sales:** \$3,970,064.00
***Month 5:**
* **Gross Sales:** \$4,531,527.00
* **Net Sales:** \$4,160,190.00

2. Executive Context & Key Takeaways

***Month-over-Month (MoM) Performance Decline:**
* **Gross Revenue** decreased by **\$210,205 (-4.64%)** from Month 5 to Month 6.
* **Net Revenue** decreased by **\$190,126 (-4.57%)** over the same period.
***Discounting & Promotional Margin:**

* In Month 5, discounts and promotional allowances accounted for **\$371,337** (~8.19% of gross revenue).

* In Month 6, discounts accounted for **\$351,258** (~8.13% of gross revenue).

* **Takeaway:** The margin gap between Gross and Net sales remained consistent (~8.1%–8.2%), indicating that the overall revenue dip in Month 6 was driven by lower total transaction volume or basket size, rather than deeper discounting.

3. Strategic Business Recommendations

1. **Conduct Channel Performance Breakdown (Store vs. Web vs. App):**

Investigate whether the ~4.6% drop in Month 6 sales stems from physical store traffic across California locations or digital platforms (Web/App).

2. **Review Category and Inventory Mix:**

Identify if top-performing SKU categories experienced stockouts or reduced demand during Month 6 compared to Month 5.

3. **Assess Loyalty Tier Engagement:**

Analyze spending behavior among Platinum and Gold loyalty members to check if core high-value shoppers reduced purchase frequency or transaction size in Month 6.

Tailoring & Next Steps

To help me tailor future insights and visual representations to your specific needs, **could you let me know your role (e.g., Executive/VP, Business Analyst, Data Scientist, Product Manager)?**

Recommended Deep Dives:

* **Channel Analysis:** Would you like to evaluate Month 5 vs. Month 6 performance split across **Store (In-Store)**, **Web**, and **App** channels?

* **Return Impact:** Should we analyze net returns data for these months to determine if return rates impacted overall top-line profitability?
