

Retail AI Agent

Date: 2026-06-30

Ask questions about retail data and get automated SQL insights.

GROSS REVENUE	TRANSACTIONS	AVG. ORDER VALUE	AVG. BASKET SIZE
\$125,578.00	207	\$607.00	2.60

QUESTION #1

give me the distribution of sales for the last 7 days available in the data

Findings:

Welcome! I am your Analytics AI Agent. To help me tailor future reports and insights to your specific focus areas, **could you please share your role** (e.g., Data Analyst, Store Manager, Product Manager, VP/Executive)?

Below is the distribution of sales performance for the last 7 available days in our dataset (**June 24, 2026 – June 30, 2026**).

1. Direct Answer & Sales Distribution

Daily Performance Summary

Date	Day of Week	Gross Sales (\$)	Net Sales (\$)	Transactions	Avg Net Transaction Value
:---	:---	:---	:---	:---	:---
2026-06-24	Wednesday	\$139,643.00	\$128,751.00	238	\$540.97
2026-06-25	Thursday	\$128,586.00	\$117,690.00	239	\$492.43
2026-06-26	Friday	\$152,475.00	\$139,413.00	267	\$522.15
2026-06-27	Saturday	\$138,862.00	\$129,611.00	237	\$546.88
2026-06-28	Sunday	\$158,614.00	\$145,028.00	249	\$582.44
2026-06-29	Monday	\$123,063.00	\$114,262.00	232	\$492.51
2026-06-30	Tuesday	\$125,578.00	\$113,634.00	207	\$548.96
Total	**7-Day Total**	**\$966,821.00**	**\$888,389.00**	**1,669**	**\$532.29**

Net Sales Distribution (Visual Chart)

7-Day Key Totals & Highlights:

- * **Total Gross Sales:** \$966,821.00
- * **Total Net Sales:** \$888,389.00
- * **Total Volume:** 1,669 transactions
- * **Average Daily Net Sales:** \$126,912.71
- * **Promotional Discount Impact:** \$78,432.00 (~8.11% overall gross-to-net discount rate)

2. Executive Context & Key Takeaways

1. **Weekend & Friday Peak Performance:**

- * Revenue peaks on **Friday (\$139.4k Net)** and **Sunday (\$145.0k Net)**.
- * Sunday generated the highest Average Transaction Value (\$582.44), indicating customers tend to make larger purchases or buy premium items over the weekend.

2. **Early-Week Lull (Monday–Tuesday):**

* Sales drop significantly early in the week, hitting a 7-day low on **Tuesday (\$113.6k Net)** with transaction counts dropping to 207 (a 22.5% decrease compared to Friday's peak volume of 267).

3. **Discount Variance:**

* Promotional markdowns remained stable at ~8% across the week. However, Thursday experienced higher discounting relative to volume, yielding a lower net ATV (\$492.43).

3. Strategic Business Recommendations

1. **Implement Early-Week "Midweek Boost" Campaigns:**

* **Action:** Launch targeted, short-duration promotions (e.g., double loyalty point days on Mondays/Tuesdays) to lift transaction counts during slow early-week days.

2. **Capitalize on High Sunday ATV:**

* **Action:** Align merchandising and digital recommendations on Fridays and Sundays toward higher-margin, premium SKUs and bundled packages to maximize basket size when customer willingness to spend is highest.

3. **Optimize Staffing & Inventory Fulfillment Schedules:**

* **Action:** Shift labor allocation and store staffing heavier toward Friday through Sunday to align with transaction spikes (averages ~250+ transactions/day on peak days vs ~200 early week).

Potential Deep Dives & Next Steps

Would you like to explore any of the following specific areas?

1. **Channel Performance Split:** Compare how Web, App, and In-Store channels contributed to these 7-day numbers.

2. **Product Category Analysis:** See which product categories drove the peak performance on Sunday vs. Monday.

3. **Returns Analysis:** Examine return rates corresponding to this time period to see if peak transaction days suffer from higher returns later.

Please let me know how you would like to proceed!

QUESTION #2

Show me the same data by channels

Findings:

To help me tailor future insights and analyses specifically to your needs, **may I ask what your role is within the organization?** (e.g., Business Analyst, Product Manager, Director, VP/Executive)

1. Channel Performance Overview (Month 5 vs. Month 6)

Below is the monthly performance breakdown across our three sales channels (**Store**, **Web**, and **App**) based on the database results:

Channel	Month	Gross Sales (\$)	Net Sales (\$)	Transactions	Net Sales / Trans (\$)	Avg. Basket Size
Store	Month 6	\$2,398,407	\$2,202,909	4,070	\$541.00	2.7
Store	Month 5	\$2,572,775	\$2,361,870	4,256	\$555.00	2.7
Store % Δ		-6.8%	-6.7%	-4.4%	-2.5%	0.0%
Web	Month 6	\$1,074,165	\$984,799	1,825	\$540.00	2.7
Web	Month 5	\$1,109,505	\$1,017,189	1,905	\$534.00	2.7

Web % Δ		** -3.2%**	** -3.2%**	** -4.2%**	** +1.1%**	** 0.0%**
App	Month 6	\$848,750	\$782,356	1,465	\$534.00	2.7
App	Month 5	\$849,247	\$781,131	1,479	\$528.00	2.6
App % Δ		** -0.1%**	** +0.2%**	** -0.9%**	** +1.1%**	** +3.8%**

2. Executive Context & Key Takeaways

* **Overall Downward Trend Driven by Physical Stores:** Total Gross Sales dropped by **4.6%** month-over-month (from **\$4,531,527** in Month 5 to **\$4,321,322** in Month 6). Over **80%** of this revenue drop originated from the **Store channel** (a decrease of \$174,368 in gross sales).
* **App Channel Resilience:** The **App** was our most stable channel, maintaining effectively flat gross sales (-0.1%) and a slight gain in **Net Sales (+0.2%)**. Improved average spend per order (\$528 to \$534) and a slight uptick in basket size offset the small dip in transaction count.
* **Digital Basket Efficiency:** Both digital channels (**Web** and **App**) saw an increase in **Net Sales per Transaction** (+1.1%), whereas **Store** orders saw a **2.5% drop** in net order value (\$555 down to \$541).
* **Consistent Basket Sizes:** Units per transaction remained remarkably steady at **2.7 items** across almost all channels and months.

3. Strategic Business Recommendations

1. **Investigate and Re-Engage In-Store Foot Traffic:**
* Since physical store sales and transaction values experienced the largest decline (-6.7% Net Sales), evaluate localized marketing campaigns or in-store events to drive store visits and revive ticket size.
2. **Double Down on App Acquisition & Retention:**
* Given the high stability and growing transaction value of App users, prioritize migrating Web and Store shoppers to the mobile app (e.g., via app-exclusive loyalty promotions or push notifications).
3. **Leverage Cross-Channel Synergy (BOPIS):**
* Introduce or promote **Buy Online, Pick Up In Store (BOPIS)** to combine digital conversion strengths with foot traffic generation for physical stores.

Next Steps & Deep-Dive Opportunities

Would you like to explore any of the following areas further?

- * **Return Rates by Channel:** Analyze if higher returns contributed to the net sales dip in physical stores vs. digital channels (``rtl_agg_by_channel_returns_kpis_month``).
- * **Customer Loyalty Tier Breakdown:** Identify which customer tiers (Platinum, Gold, Silver,

Bronze) reduced their spend in Month 6 (`rtl\_agg\_overall\_loyalty\_monthly\_kpis`).

* **Individual Store Performance:** Identify specific store locations driving the overall store revenue decline (`rtl\_agg\_overall\_store\_monthly\_kpis`).
